Test Summary Report – Swag Labs (Login Page)

Environment:
• Website: Swag Labs
• Browser: Chrome Version 140.0.7339.208 (Official Build) (64-bit)
• OS: Windows 11

Scope:
Testing focused only on the Login page functionality.

Test Execution Results:
• Total Test Cases: 31
• Passed: 28
• Failed: 3

Bugs Reported:
• Total: 3 Bugs

o **UI/Security Bug:** Password field allows copying → identified during exploratory testing . →
Severity: Low.

o **Technical Bug:** Error message for valid login is too generic →
Severity: Medium.

o **Security/Authorization Bug:** User can access the Inventory page without login by directly entering the URL → **Severity: High.**

Conclusion:
The Login page is generally functional for valid scenarios. However, three issues were identified: one low-severity bug related to password security, one medium severity bug affecting error handling, and one high-severity bug exposing unauthorized access. Addressing these will improve overall security and user Experience.
